

CORPORATE CAPABILITY STATEMENT

Global Stone Sourcing & Supply Solutions

Connecting customers with reliable sourcing, procurement, manufacturing and logistics solutions from origin to destination.

COMPANY OVERVIEW

More than three decades of industry experience

MP Technologies Inc. was incorporated in 1992 to connect customers with reliable manufacturing and sourcing solutions throughout the global stone and surface materials industry. Our experience spans natural stone, engineered surfaces, international trade, logistics coordination and project procurement.

We support distributors, fabricators, developers, contractors and project customers with sourcing strategies shaped around quality, availability, timing and destination requirements.

CORE CAPABILITIES

What MP Technologies brings to the engagement

Global Sourcing

Identify and qualify sources for natural stone, quartzite, marble, granite, porcelain, sintered stone and engineered surfaces.

Project Supply

Coordinate sourcing and procurement for residential, commercial, hospitality and institutional project requirements.

Private Label Programs

Support differentiated branded programs for distributors, retailers and strategic partners.

OEM Manufacturing

Coordinate customized products and manufacturing programs aligned with market requirements.

Logistics Coordination

Support export documentation, container planning, ocean freight, customs and destination logistics.

Material Planning

Evaluate product requirements, quantities, schedules and sourcing alternatives before procurement decisions.

HOW WE WORK

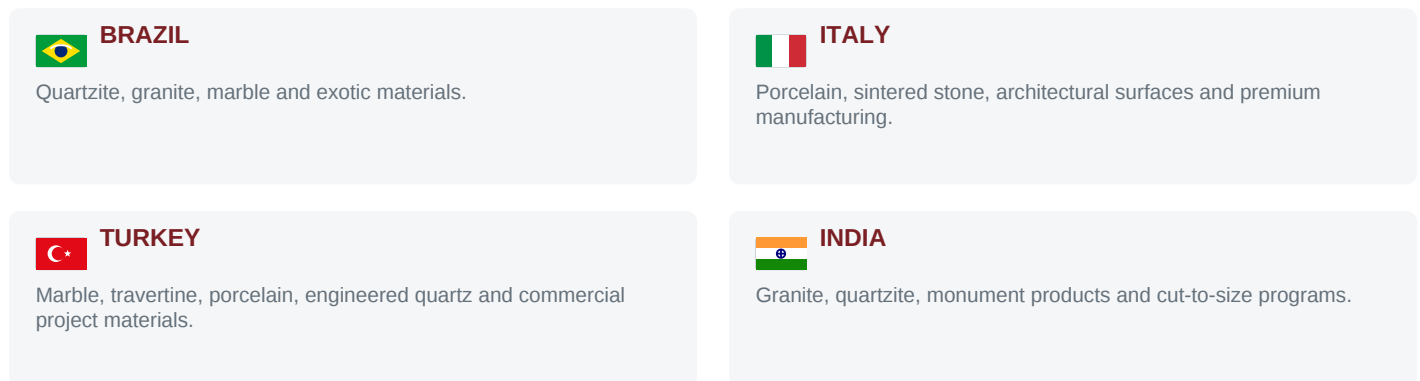

A disciplined path from requirement to delivery

From a single sourcing requirement to an ongoing supply program, MP Technologies structures each engagement around the customer's product, quantity, quality, timing and destination requirements.

GLOBAL SOURCING REGIONS

Relationships across major production markets

Start a Sourcing Conversation

For sourcing inquiries, include the material or product, approximate quantity, destination and required timing when available.
